

Sampler of Grasses for 2020

**Hakonechloa macra
'All Gold'**
(Hakone Grass or
Japanese Forest Grass)

A brilliant grass that absolutely glows in the shade! More chartreuse in heavier shade and brighter gold in more sun. Plant where it can cascade down slopes, drape over rocks, crawl over edges of walls or even in containers.

**Calamagrostis acutiflora
'Karl Foerster'**
(Feather Reed Grass)

Clumps with a compact, erect growth habit. Great backdrop for lower growing perennials throughout the year. Also useful for screening purposes. A good choice for heavy clay soils.

Our 21st
Year!

**Hakonechloa macra
'Aureola'**
(Hakone Grass or
Japanese Forest Grass)

Cascading habit; looks like a golden waterfall. Infused with pink and red in the fall. Plant where it will cascade down slopes, drape over rocks, crawl over the edges of walls or even in containers

**Miscanthus sinensis
'Gracillimus'**
(Maiden Grass)

One of the oldest and well-known cultivars of Miscanthus. Beautiful rounded mounds of fine, silver-veined green leaves arch gracefully as they sway in the wind. Can be used as a specimen, for massing or screening or at the pond's edge.

Panicum variagatum
'Ruby Ribbons'

*Many more
varieties
available
at the
farm.*

Noted for having blue-green foliage that matures by mid-season to an attractive purple-red. Foliage clump is topped in mid-summer by finely-textured, pink-tinged, branched flower panicles which hover over the foliage like an airy cloud. Panicles turn beige as the seeds mature in fall with the seed plumes persisting well into winter.

Seeds are a food source for birds in winter.
